

## **Growth and success**

Many of the Marconi companies have experienced dynamic growth during the past ten years, notably MSDS with an average annual increase in sales of 30%.

Following the pattern established in 1982 with the formation of Marconi Underwater Systems, four new companies are being established largely based on the business previously developed within MSDS. There will be a greater degree of specialisation in the activities of these companies and they will be more capable of serving our customers efficiently and of vigorously seeking new markets.

## **Existing Contracts**

Although some rationalisation of products will occur all existing contracts will be completed by the current project teams and factories. No movement of staff is involved.

## **Marconi Projects Limited**

In late 1983, Marconi Projects was formed, to co-ordinate large turnkey projects involving more than one Marconi company.

## **Organising for the Future**

The rationalisation of activities also provides an opportunity for the promotion of successful managers. This, together with the formation of the Projects company, prepares the way for a new phase in the growth of the Marconi Company.

## **Previous Structure**

The main Marconi companies, up until 31st March 1984, were as follows:

**Marconi Space & Defence Systems Ltd**

**Marconi Radar Systems Ltd**

**Marconi Communication Systems Ltd**

**Marconi Underwater Systems Ltd**

**Marconi International Marine Co Ltd**

**Marconi Electronic Devices Ltd**

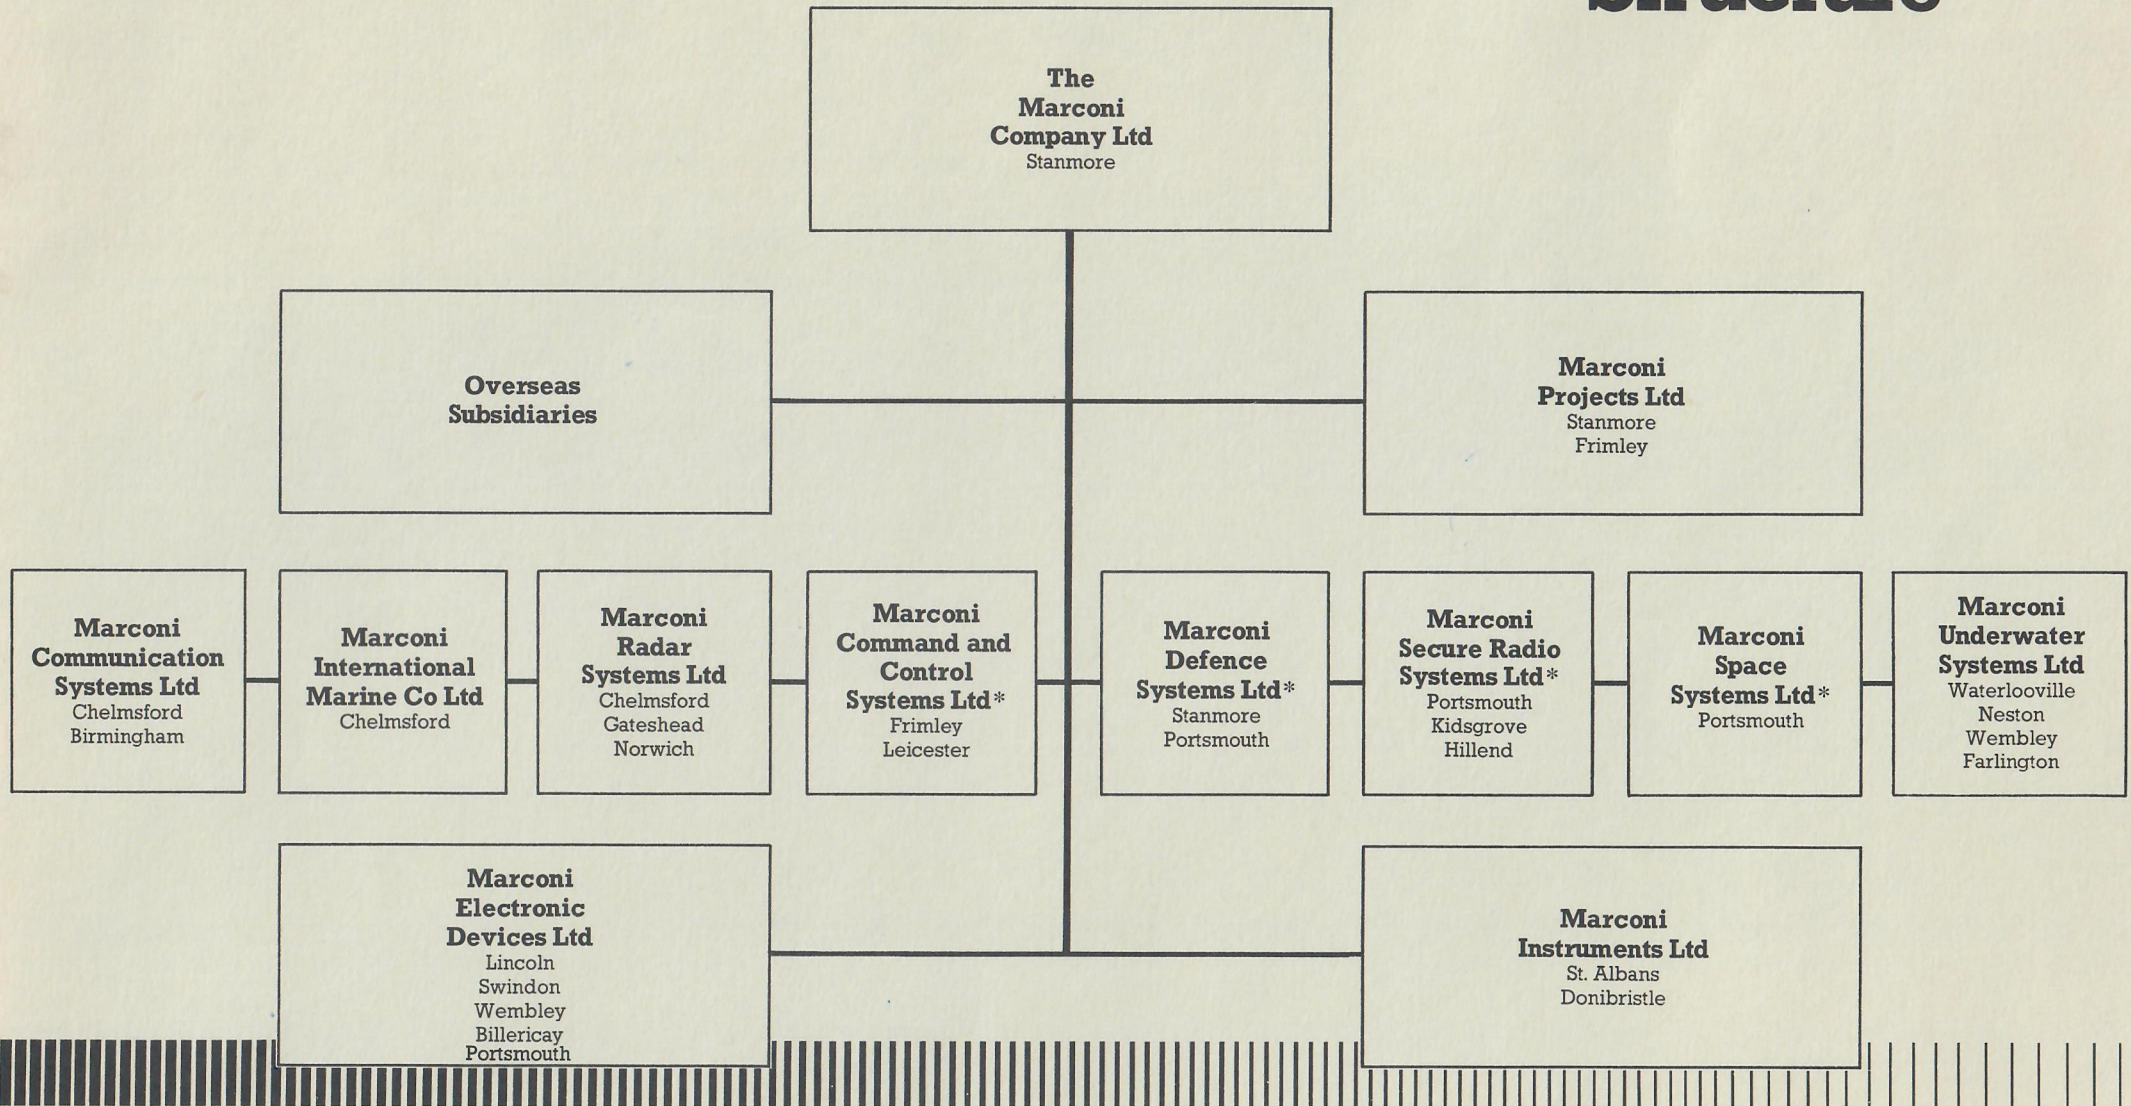

**Marconi Instruments Ltd**

**Marconi Projects Ltd**
